# Project Engineer

## Job description

Journeo

## Delivering connected journeys

Journeo is a pioneering technology group that helps the transport community deliver services with confidence, providing end-to-end solutions that connect millions of journeys, in real-time, every day.

We install, integrate and maintain market-leading technology and infrastructure systems, manufactured by ourselves and our trusted partners, to deliver smarter, safer and more sustainable transport services.

Built on real-world experience and developed in partnership with customers, Journeo's solutions combine the latest systems, cloud software and end-to-end support to deliver the technology behind future transport services.

We are constantly developing and innovating solutions to support our customers' legacy systems, current technologies and future plans, giving their passengers the peace of mind to choose public transport.

Connected systems,  
for connected journeys.

## Overview

<b>Job title:</b>	<b>Project Engineer</b>
<b>Department:</b>	Projects
<b>Responsible to:</b>	Installations Manager
<b>Responsible for:</b>	Delivery of installations
<b>Location:</b>	Home/Field based

This is an exciting opportunity working as part of the Projects Team to carry out installations of electrical systems to vehicles of various types (PSV, HGV, LCV.) Most installations are CCTV systems, with other solutions including passenger counting, telematics, onboard Wi-Fi and many more.

## Main duties

The successful candidate will:

- Install electrical systems on vehicles.
- Report accurately and promptly to the Installations Manager.
- Complete all aspects of installations, from pre-work surveys through to sign off for completion.
- Carry out installations with vehicle manufacturers, giving basic demonstration/training to their staff for roll out of large orders.
- Problem-solve on new installations, and previously installed solutions, to make improvements to system design and services.
- Work flexibly, as some installations are night work due to the availability of customer vehicles.
- Manage stock being supplied for installation projects, which needs to be accounted for and signed off against fitment.
- Work both alone and with the Project Engineer for installations, including first-in-class installations and trial/demo fitments for both mobile and static systems.
- Work with good presentation and a professional attitude; this is a customer-facing role which will include working with employed or contracted staff.
- Work closely with the Project Engineer to make sure both can cover each-others role for holidays/sickness and work together on large projects.
- Work within Journeo's Health and Safety and business processes.

## Must haves

- Minimum of 2 years' experience working in a similar industry or on vehicle electrical systems.
- Full UK driving licence.
- Passport (Valid for more than 6 months). This is essential as role includes travel both within the UK and overseas.
- Excellent communication skills are required, both verbal and written.

## Benefits and provisions

- Competitive salary - £30,000-£35,000 per annum
- Training (In house/courses as required)
- 25 days Holiday
- Company van/car
- Laptop
- Mobile phone
- Specialist equipment
- PPE
- Pension scheme
