

Key features

Works with all Journeo TFT LCD and LED real time passenger information displays

Highly visible with braille identifier, "Bus Info" text and icon

Announces location, time and departures for a stop

Wireless solution with pole, shelter and wall mount options

Resilient and up to 7-year battery life

Audio accessibility for all

The Journeo Push Button Audio system is a hassle-free solution that increases audio accessibility across transport networks. It provides all customers with easy access to audio passenger information, without the need for a personal device or other equipment.

Compatible with all Journeo TFT LCD and LED displays it is quick to deploy and a long-lasting solution for audio accessibility. A 'plug and play' system, supplied with new displays or retrofitted to existing estates, it is wireless, simple to install and designed to meet the demanding requirements of transport environments.

With an internal battery life of up to 7 years, a ruggedised cover and complete protection against the elements, Journeo Push Button Audio is a durable addition to your accessibility programmes and initiatives.

The importance of accessibility to inclusion and patronage

Recent research reveals that 64% of blind and partially sighted passengers feel bus timetables are inaccessible, and more than one third of users believe websites and apps are difficult to use.

Blind and partially sighted travellers have also explicitly called for real-time information on departures, route changes and cancellations in accessible formats.

Work from the Campaign for Better Transport has reinforced that RTI increases confidence and makes it more likely for people to choose the bus.

Journeo's Push Button Audio system is an important part of the integrated solution that can tackle exclusion and increase passengers in your transport network.

Journeo

Connected systems, for essential services.

Journeo is a pioneering technology company that helps the transport community deliver services with confidence; connecting millions of journeys, in real-time, every day.

We design, install, integrate and maintain world-class technology and infrastructure systems, delivering smarter, safer and more sustainable transport services.

We are constantly developing and innovating solutions to support our customers' legacy systems, current technologies and future plans, giving their passengers the peace of mind to choose public transport.
